Member of Technical Staff
VMWare
1 Toronto St Suite 1100,
Toronto, ON M5C 2V6
Re: R2112617

Dear Hiring Manager,

I am a recent Computer Programming Analyst graduate looking to apply my experience in Java. My programming experience with Java started back in high school. Rest assured that I am very comfortable working with this language. When I came across your job posting for a Member of Technical Staff at VMWare in the company's website, I knew that this was the perfect entry level job for me. As I can apply my previous experience with Java, as well as further learn from the best engineers in the industry. I would love to be a part of the company as I know I can learn more from the senior engineers and I know that the company provides a healthy environment for its employees.

I know I am a valuable addition to the company as I have built many projects using Java and comfortable working with it. Projects such as games, android apps, and CRUD operation systems that is connected to a database using SQL. These experiences have led me to grow my skills that are directed with this role.

These are some of the skills I can bring to your company that I have learned from school. I have worked with many projects alongside a team ensuring to deliver high quality and efficient applications. As a working student, I have learned to balance and prioritize my responsibilities. From working as a customer service representative, I learned to work in uncertain environments and adjust accordingly.

If given the opportunity to work for VMWare, these are just some of the qualifications I can bring. I am extremely interested in applying my experiences to help the company better. Thank you for your time and consideration. I hope to hear from you soon and am looking forward to an interview. I can be reached out through my email vianca_pagaduan@yahoo.com or by phone 647-829-7836.

Sincerely,
Marie Pagaduan
